

Hybrid Presentation Format – Official Notice

Due to the international nature of the conference and the ongoing challenges related to visa processing and global travel constraints, the Scientific Committee has adopted a hybrid presentation format for the 2025 conference.

This approach ensures that all accepted presenters—whether attending in person or joining virtually—have the opportunity to deliver their work without interruption or disadvantage.

All Invited Speakers and Oral Presenters who are unable to travel to Canada will be able to present live online through the conference’s secure hybrid platform. Virtual presentations will receive the same scientific recognition, certificate of presentation, and program placement as in-person sessions. This hybrid format allows the conference to maintain its international integrity, support global participation, and provide equitable access for presenters and attendees worldwide.

DAY 1 — November 28, 2025

Registration Desk (Afternoon Session)

Day 1 of the conference is dedicated exclusively to participant registration and check-in. This two-hour afternoon session allows attendees to receive their conference materials, badges, and essential information prior to the scientific sessions beginning on Day 2.

Time	Activity	Details
14:00 – 16:00	Registration Desk Open	Participant check-in, badge collection, conference package, and information support
